

“The Modular wiring systems offers a very high degree of flexibility and versatility for both the installer and end-user.”

Sam Riati
Customer Position – HeyDay5 (NSW)

231 Elizabeth Street

Occupying a prominent corner position, this 23,275 sqm building, located in the mid-town precinct of Sydney's CBD, sits on the corner of Elizabeth, Bathurst and Castlereagh Streets. The office space provides superb views overlooking Hyde Park and out towards the spectacular Sydney Harbour across large flexible floor plates.

It will be home to nearly 2000 public Sector workers, with the government taking out a 12-year lease agreement for levels 2-13.

The project scope included more than 3,300 DALI light fittings, across 15 floors in total. A combination of WireByClick 3PIN and 5PIN modular lighting loom solutions were supplied for all general lighting through-out. As part of the process, MyModular completed detailed marked up drawings complete with a bill of materials for each floor. Products were locally made and supplied within 2-4 weeks of receiving the purchase order.

“You provided a great system backed by a great team that was easy to work with.”
