

□ LARGE HOSPITAL PROJECTS □

JOAN KIRNER WOMENS'S & CHILDREN'S (SUNSHINE HOSPITAL)

Situation

The Joan Kirner Women's and Children's at Sunshine Hospital consisted of several floors within in the project scope; including 20 labour delivery rooms and 39 special care nursery cots. Additionally, 55 existing acute adult inpatient beds also required to be refurbished and formed part of the project.

Task

Due to the complex nature of the project, a modular plug and play system was desired to assist the install team with not only first fix and second fix installation, but with streamlined commissioning.

Action

MyModular designed a custom lighting and power solution for the project; providing modular products to over 190 rooms across 7 floors.

Result

Solutions using the MyModular products reduced lead times from 12 weeks to 4 by using an Australian Made local modular cable manufacturer.

Client
Stowe Australia

Project Scope
190 Rooms with over 10,000 DALI Light Fittings + 3,000 GPO's

Location
St Albans, VIC

Products Used
36,000+ WBC and MLEX Products

Tags
