

□ LARGE COMMERCIAL PROJECTS □

727 COLLINS STREET TOWER 2

Situation

This 38-storey office tower recognized as a grade A, quality office space. Lighting products are re-tested to avoid unnecessary wait times, making for a quick and easy lighting installation.

Task

Use WBC products to provide lighting to 23 levels of the tower. Provide marked up drawings in advance. Create an affordable and effective designed lighting, with an ease of modifying and reinstallation.

Action

Provide 6,880 total light fittings across 23 floors, on a delivery schedule for 11 deliveries over a 7-month period. All lights are pre-tested to ensure zero product failures.

Result

Made sure that all 11 deliveries across the 7 months were on time. Marked up drawings designed in advance with the project manager to ensure the most affordable and effective design was applied to the tower.

Client
KLM Electrical

Project Scope
23 Levels + 6,880 DALI Light Fittings

Location
Melbourne, VIC

Products Used
15,000+ WBC Products

Tags
Commercial, WBC, Light

"We had zero product faults with the WBC gear which was great given the product (competitor) we used on Tower 1 had 20+ faults."

Project Manager – KLM Electrical
