

## □ LARGE COMMERCIAL PROJECTS □

# ADELAIDE OVAL HOTEL

### Situation

With a construction budget of \$42 million, MyModular were engaged by Nilsen to design and deliver lighting and power to all rooms and corridors. Additionally, custom driver panels were also part of the requirements of the project.

### Task

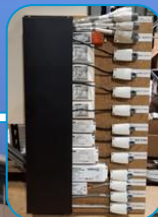

To provide a lighting solution that is quick to install, pre-tested and locally sourced material to ensure the project timelines were met.

### Action

My Modular worked closely with the customer to design the driver panels and provide a comprehensive set of shop drawings which assisted the site install team during rough in.

### Result

My Modular's 5Pin and 3Pin modular loom lighting solution was applied to over 138 rooms and corridors as well as using the MLEX product range for the driver panels.

**Client**  
Nilsen Australia

**Project Scope**  
138 Rooms and Corridors

**Location**  
Adelaide, SA

**Products Used**  
WBC and MLEX

**Tags**  
WBC, Light, Power

*“The drawings provided are very easy to read. You can usually pass them straight through to the site team for install. MyModular have a team that understands the industry, meaning you can trust them to coordinate directly with your switchboard manufacturer, lighting suppliers etc. without risk.”*

Michael Hodby Project Manager - Nilsen Australia
