

□ LARGE COMMERCIAL PROJECTS □

BARANGAROO (INTERNATIONAL TOWERS)

Situation

The Barangaroo Towers is Sydney's largest urban renewal project which offers 280,000sqm of office space accommodation up to 23,000+ workers. Being such a large project, there was a push to utilise plug and play systems where possible to simplify installation.

Task

Provide a modular lighting system that can be used as general lighting throughout which consisted of a combination of 5Pin and 3Pin modular lighting loom solutions.

Action

MyModular provided a full set of installation drawings for the entire modular wiring scope; which powered over 50,000+ DALI fittings for the base building and tenancy fit outs across the three office towers.

Result

As all products were manufactured locally in Australia, material was delivered within 3-4 weeks from the design being completed.

Client
Stowe Australia
