

□ LARGE HOSPITAL PROJECTS □

BLACKTOWN HOSPITAL

Situation

A redeveloped 9 story hospital. Wanted a time saving and money saving lighting solution locally made for faster installation.

Task

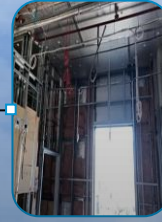

Reduce onsite labour and risk by using a 'plug and play' lighting product. Confidence with all products being pre-tested in the factory before being sent to site.

Action

Full set of drawings provided by MyModular. A modular solution that allowed for a quick install on the new multi-million-dollar building.

Result

Using over 7,000 MyModular products for both Lighting and power solutions over the 9-story hospital. Lighting products manufactured in Australia reducing lead times significantly.

Client
Stowe Australia

Project Scope
Power and Lighting Solution

Location
Blacktown, NSW

Health, Light, Power, WBC

"Implementing the Wire By Click system was not only a cost saving solution during our initial installation, but an investment for any future alterations that may be required due to the ease with which modifications can be made."

Nathan Hemmings Project Manager - Stowe
