

TEMP. LIGHTING PROJECTS

ELTRIX TEMP. LIGHTING

Situation

Alastair Koenig from Eltrix contacted MyModular because an electrocution occur onsite, and he was interested in the safety our products provide.

Task

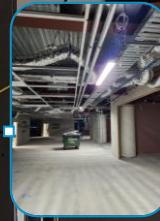

To provide an ELV temp. lighting solution, that needed to replace the 240V temporary lighting system that was already installed.

Action

Used MyModular's ELV Temporary Lighting solutions to ensure there wasn't a risk of electric shock. Provide a safe construction site that still has adequate lighting even in a power outage situation.

Result

MyModular were able to provide Eltrix with a suitable ELV solution that was both safe and practical.
