

## TEMP. LIGHTING PROJECTS

# FORENSIC MEDICINE & CORONERS COURT COMPLEX

### Situation

This new three-story building is a government development which will include high-tech facilities. Provide temporary modular lighting products that can be installed quickly and efficiently.

### Task

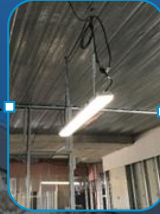

Modular emergency light fittings. Supply affordable lighting solutions which can have their lighting layouts modified.

### Action

Designed in advance in conjunction with the project manager to ensure the most affordable and effective design was applied to the overall project. Ability to modify lighting layouts. Temporary lighting system that was used can be utilized on there next project.

### Result

Providing 1,780 total temporary light fittings across 3 floors. Each floor designed in advance in conjunction with the project manager. Lighting products made in Australia, thus making lead times shorter.

**Client**  
Stowe Australia

**Project Scope**  
650 Temporary Light Fittings

**Location**  
Lidcombe, NSW

**Products Used**  
2,000+ ELV-Lite Products

**Tags**  
Health, Temp Lighting, ELV

*“The use of My Modular Wiring has proven to be the most efficient lighting installation method, time and time again. It is unlikely my team and I would consider the use of the conventional plug base wiring again for any other project in the future.”*

**Ricky Gatt Project Manager- Stowe Australia**
