

## □ LARGE HOSPITAL PROJECTS □

# NEW ROYAL ADELAIDE HOSPITAL

### Situation

The Royal Adelaide Hospital (RAH) is South Australia's largest hospital owned by the State Government and the largest build in South Australia ever undertaken. With a total budget of \$1.8 billion; the RAH forms part of the BioMed City District in Adelaide's CBD.

### Task

To provide 5Pin modular lighting looms for all general lighting to assist in speed and efficiency of installation. The Australian made and factory pre-tested leads created a strong supply chain throughout the life of the project.

### Action

MyModular provided a full set of marked up drawings and bill of materials for each zone which correlated to the intended installation.

### Result

800 rooms provided with modular lighting solution, which equates to more than 40,000 DALI total light fittings. The benefits of modular allowed for a streamlined commissioning process, saving the customer time and money.

**Client**  
Nilsen Pty Ltd

**Project Scope**  
800 Rooms with over 40,000  
DALI Light Fittings in Total
