

□ LARGE COMMERCIAL PROJECTS □

MELBOURNE QUARTER TOWER

Situation

Contractors overlap in site areas, causing inefficiencies and commissioning errors in complex projects like hospitals. Simplifying electrical tasks is key for managing extensive to-do lists.

Task

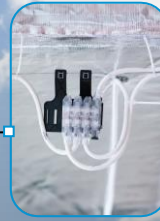

Introduce a user-friendly, plug-and-play system to reduce labor and risk, eliminating on-site terminations. Ensure confidence with a reliable Australian supply chain and a pre-tested product, cutting commissioning time.

Action

Provide clear electrical shop drawings for easy installation. Use a modular approach to accelerate pre-trade completion.

Result

Efficient on-site handling through tailored delivery. Reduced commissioning for lighting and power, ensuring cost-effectiveness.
