

MODULAR PROJECTS

PROGRESS ED

Situation

Progress Ed is a customisable education system tailored for expanding schools facing space constraints. It offers a modular, multi-level solution that emphasizes flexibility and adaptability.

Task

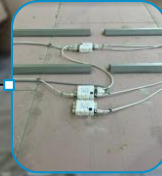

Ausco reached out to MyModular to utilize our MLEX system on 15+ modular education buildings, leveraging our seamless integration with their building approach for Progress structures.

Action

MyModular provided an all-inclusive turnkey solution covering lighting and power needs, including supplying enabled light fixtures, power sockets, and modular load centers.

Result

Our project deliverables enabled Ausco to offer a modular wiring solution, enhancing their system compared to traditional hardwiring methods.

Client

Ausco Modular

Project Scope

Education & modular building

Location

South Australia

Products Used

**MLEX, Enabled power & outlets,
Modular load centres**
